A superb church organ need not be expensive

Schober ALL-TRANSISTOR ELECTRONIC ORGANS

... NOW CUSTOM BUILT FOR
YOUR CHURCH INSTALLATION
or in EASY-TO-ASSEMBLE KITS
at savings of more than 50%

World-famous, preferred for their tonal qualities regardless of price

Designed by organists for organists, the new All-Transistor SCHOBER RECITAL MODEL sounds like a fine pipe organ. Its 32 voices and 6 couplers and highly accurate pipe organ tones in 5 pitch registers are professionally superior. The Recital Model has the LIBRARY OF STOPS™ Kit feature which adds countless extra voices for instant plug-in. Console, pedals and keyboard meet A.G.O. specifications. A comparable organ through dealers would cost \$5000 and more. From Schober in kit form, \$1500. Save on the fully-built version, too, if preferred, because the organ comes to you direct from the manufacturer.

Optional extras: custom voicing of assembled organs to meet specific requirements... thirteen-piston, capture-type Combination Action which makes the Recital Organ suitable for most rigorous church and recital work... unique Schober REVERBATAPE® Unit which converts the sound of any modest chamber into that of a large auditorium... specially engineered acoustic installations. Other Schober Organs cost as little as \$550 in kit form. You may buy a complete set of kits—or spread the cost over a period of time by ordering in sections—or you may order your organ custom-built in the Schober plant.

A "first" organ for your church, built to A.G.O. specifications, with pipe organ tone and church voicing.

An "extra" organ for sanctuary, chapel, church school, offering concert hall acoustics even in the smallest room!
